

# flexGRIP<sup>®</sup> Neo.

catheter cushion and **stabilization device**

## ALPHA

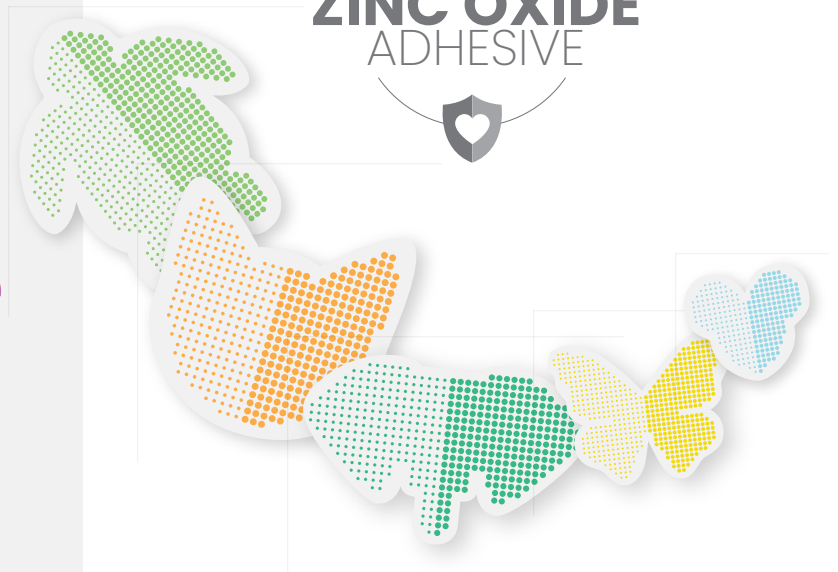

the answer to known issues  
with sutures:

- ✓ Central Line Associated Blood Stream Infections (CLABSI) are reduced by 80% when using a fixation device<sup>1</sup>
- ✓ designed to improve patient comfort & safety
- ✓ nomore needle stick injuries for care givers

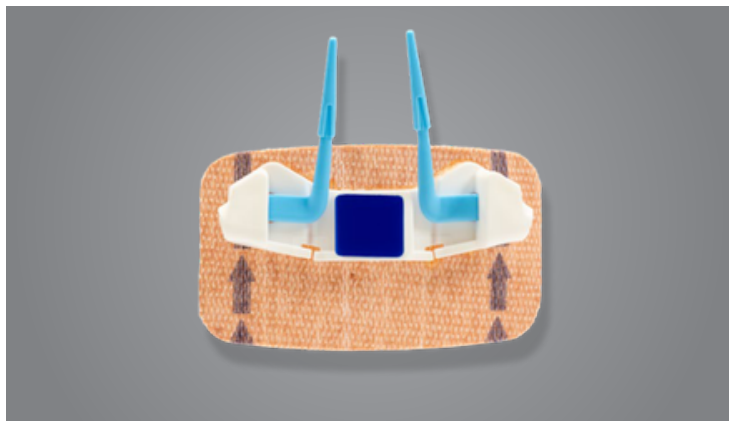

safe  
comfortable  
easy to use  
versatile

SKIN-SAFE  
**ZINC OXIDE**  
ADHESIVE

# flexGRIP<sup>®</sup> Neo.

The FlexGRIP Alpha is for securement of virtually all catheters containing wings with suture holes.

# ALPHA

## features

- zinc oxide adhesive for skin-safe adherence, even in high humidity incubators
- "suture-like" flexible posts for easy-on/easy-off securement
- TRIMMABLE

## benefits

- secure fixation of all suture-winged catheters
- skin-safe adhesion, designed to avoid MARS
- intuitive, fast, easy

## PIVC

The answer to known issues with **PIV-catheters**

Designed to:

- ✓ reduce catheter dislodgment and migration
- ✓ reduce infiltration, extravasation, phlebitis and thrombosis
- ✓ reduce pressure-related injuries
- ✓ reduce MARS
- ✓ prevent luer-lock loosening that leads to leakage

safe  
comfortable  
easy to use  
versatile

bedal International

# flexGRIP<sup>®</sup> Neo.

FlexGRIP NEO devices are designed to function as cushions and are made with state-of-the-art, skin-safe zinc oxide adhesives to prevent skin tears (MARSIs) and pressure injuries, and to prevent phlebitis, infiltration/extravasation (PIVIEs), and occlusion. Fixation of the luer lock onto the pressure activated blue glue not only provides a strong, secure and safe fixation, it also prevents unscrewing of the luerlock and thus preventing leakages.

## Zinc oxide

- Zinc oxide is specifically selected to be gentle on the neonate skin.
- Designed to prevent MARSIs
- Reliable, skin-safe adhesion, even in high humidity incubators

\* data on file

Bedal products are sterile & latex, PVC & DEHP-free.  
Bedal products are CE approved & FDA registered.

# PIVC

## features

- easy-on/easy-off securement of PIVCs
- comfortable
- low profile
- skin-safe zinc oxide adhesive

## benefits

- fits all winged and non-winged PIVCs
- prevents pressure-related injuries and MARSIs\*
- prevents loosening and leaking\*
- prevents catheter micro-movement, the cause of: infiltration, phlebitis, extravasation, thrombosis\*
- skin-safe adherence, even in high humidity incubators

bedal International

# flexGRIP<sup>®</sup> Neo.

# PICC

**FlexGRIP Neo. PICC** is designed for safe, low-profile, reliable securement of neonatal PICCs. skin-safe zinc oxide adhesive allows for use in all neonatal environments, including high humidity incubators. FlexGRIP's bioengineered catheter retainer (with overlying strips) provides maximum GRIP-strength, prevents dislodgement & migration and other catheter complications. Quite simply, this is the new standard of care in neonatal PICC securement.

## Zinc oxide

- Zinc oxide is specifically selected to be gentle on the neonate skin.
- Designed to prevent MARS1
- Reliable, skin-safe adhesion, even in high humidity incubators

\* data on file

Bedal products are sterile & latex, PVC & DEHP-free. Bedal products are CE approved & FDA registered.

## Features

- compatible with virtually all silicon and polyurethane
- PICCs low profile
- skin-safe zinc oxide adhesive

## Benefits

- designed to reduce or prevent virtually all PICC complications easy to use
- fast, sure, safe
- skin-safe adherence, even in high humidity incubators

bedal International

# flexGRIP<sup>®</sup> Neo.

# Umbilical

**FlexGRIP Neo. Umbilical** uniquely secures umbilical vessel catheters quickly and reliably, assuring proper positioning while preventing migration and dislodgement. Utilizing FlexGRIP's skin-safe zinc oxide adhesive, this device provides unrivaled mechanical stabilization of the catheter in all neonatal environments.

## Zinc oxide

- Zinc oxide is specifically selected to be gentle on the neonate skin.
- Designed to prevent MARS!
- Reliable, skin-safe adhesion, even in high humidity incubators

\* data on file

Bedal products are sterile & latex, PVC & DEHP-free. Bedal products are CE approved & FDA registered.

## Features

- Compatible with virtually all umbilical vessel catheters
- Needle-free securement
- Unrivaled GRIP-strength
- Simple, easy to use
- skin-safe zinc oxide adhesive

## Benefits

- Fast, safe and needle-free solution
- Skin-safe adhesive, compatible with high humidity incubators
- Simple, easy to use
